REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: No prior art discloses temperature measurement using the parasitic characteristics of the semiconductor device under test in order to determine its reliability. The closest related prior art is Lipp, which discloses a temperature measurement circuit which uses a temperature dependent junction voltage. The circuit of Lipp utilizes parasitic bipolar transistor elements formed in a CMOS substrate, but it does not disclose a heating element formed within the device under test, nor does it disclose stressing the device under test in order to observe a possible failure.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
